

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PREFACE.

TWENTY years having elapsed since the issue of the last Index to the Professional Papers of the Corps, a revision brought up to date has lately become a pressing want, as the task of tracing papers published since 1872 has become year by year more difficult.

In compiling the present Index the entries in the old Index have been carefully checked, and, where necessary, revised before incorporation with those of the last 20 years, and the Editor desires to place on record his obligation to Q.M.S. W. J. Sampson, R.E., for the care with which this has been carried out and, it is hoped that the present publication will be found a correct and reliable Index to the Professional Papers of the Corps from their commencement in 1837 to the present date.

W. A. GALE, *Capt., R.E.*,

Secretary, R.E. Institute.

CHATHAM,

July, 1893.

CONTENTS.

	PAGE
Index of Subjects	1
Index of Authors	101

NOTE —The different series are distinguished in the column for volumes by the following prefixes : —

Q. Quarto series.

I. Intermediate *Corps Paper* between the quarto series and the new series.

N. New series.

O. *Occasional Papers* series.

C. Confidential series.

P. Prize Essays.

The four Prize Essays which have gained the Corps medal are shown in the Subject Index under the heading "Prize Essay."

The rank of the author is in all cases that held by him at the time of writing the Paper.

INDEX OF SUBJECTS.

Subject of Paper.	Name of Author.	Vol.	Page
ABYSSINIAN Expedition.	Lt.-Col. St. C. Wilkins, R.E.	N XVII.	140
„ Railway	Lieut. T. J. Willans, R.E.	N XVIII.	163
ACOUSTICAL Unit of Dimensions of Rooms.	Lieut. F. J. Day, R.E....	O III.	42
